(to be continued on page 2 only, if your scope of supplies does include pressure vessels)

We herewith declare

- that our scope of supplies does include pressure vessels as per a/m EC-directive, which comply with
 - the German "Druckbehälterverordnung"
 - the EC-directive 97/23/EG in particular regarding
 - type identification with required declarations and warning direction
 - operating instructions, if needed
 - identification of the pressure vessel (CE-sign and registration number) or
 - declaration of conformity
-

In addition to the instructions of the a/m EC-directive we confirm, that

- the pressure vessel can be used in a compressed-air ductwork system protected up to 15 bar pressure.
 - the protection device, which is necessary for that, is part of our scope of supplies and corresponds to TRB 403, part 3 ff.
 - prior to the commissioning there will be an acceptance test according to the "Druckbehälterverordnung" in our works.
-

If not requested by the "Druckbehälterverordnung" already, we will provide the following records for the pressure vessels:

- General drawings with outer dimensions, connection- and foundation specifications
- Drawing incl. wall thickness
- Informations regarding basic and additional materials used and regarding the welding process
- Verification of an (additional) nondestructive test made as zero measurement for repeated checks
- Verification of the allowed endurance
- Spare Parts List
