
The aim of our global procurement activity is to ensure the manufacture of tools of the highest possible quality at a total of six production sites. The use of high-quality raw and auxiliary materials and the observance of ecology, economy and ethics are the basis of our purchasing concept.

Our philosophy

- Ensuring security of supply through a low-risk procurement strategy
 - Long-term and cooperative relationships with our suppliers
 - Reliability and fairness towards our business partners
 - Ensuring the premium quality of our products by using adequate raw materials
 - Exploiting synergy effects throughout the entire PFERD-Group
-

Our suppliers are characterized by

- high quality consciousness
 - innovative strength
 - flexibility
 - cost awareness
 - responsible action along the entire value chain
-

We act sustainably through

- a mandatory code of conduct
- comprehensible award decisions taking into account all relevant compliance and environmental aspects as well as the total cost of ownership
- a responsible handling of all resources, especially people, nature and the environment
